Profile Summary

As a Python backend developer, I am passionate about creating innovative solutions in the face of complex problems. With a focus on collaboration and communication, I believe that successful projects are built by working together. I have a strong drive to continuously improve my skills and stay up-to-date with the latest technologies and best practices

Skills

Python

Django

Django rest framework

Sql

PostgreSQL

RabbitMQ

Redis

Docker

oop

Unittest

Git

Projects

• Theivan

Theivan is an e-learning platform that I collaborated on using Python Django. As a member of the development team, I contributed to the project in multiple areas, including database design and unit testing. I also designed and implemented the platform's application programming interface (API), which enables users to interact with a variety of services, such as purchasing and accessing tutorials. I worked closely with the team to ensure that the platform was delivered on time.

Language

English : Intermediate

Education

• 1397 - 1401

Bachelor of Software engineering

Iran
